

**FOR IMMEDIATE RELEASE**

**LPGCD TO HOST OPEN HOUSE EVENT**

*Join us for an evening of learning, fun, and connection*

[GIDDINGS, TX | February 5, 2025] – The Lost Pines Groundwater Conservation District (LPGCD) is excited to invite the public to an engaging and educational Open House on Tuesday, February 25, 2025, immediately following the Board Meeting. The event will probably begin around 6:00 PM (ish) and run until 7:00 PM (ish).

This interactive event offers a great opportunity for all ages to dive into the world of groundwater conservation. Explore our state-of-the-art digital groundwater model, see how water moves and interacts within aquifers, and experiment with a hands-on physical aquifer model to better understand how water is stored beneath the surface. For a fun twist, create your own edible aquifer using tasty ingredients while learning about the layers and processes that make up our groundwater systems.

This is also a perfect time to meet the LPGCD board members and staff who represent our district's interests and are dedicated to conserving our local water resources. The event is designed to be an informal, community-focused gathering with no business discussions or official matters taking place. Refreshments will be provided, so come enjoy a fun evening of learning, connection, and exploration.

We look forward to seeing you there!

**ABOUT THE LOST PINES GROUNDWATER CONSERVATION DISTRICT**

The Lost Pines Groundwater Conservation District is dedicated to the protection and conservation of groundwater resources in Bastrop and Lee Counties. Through educational programs, community outreach, and strategic resource management, the District strives to ensure sustainable water supplies for current and future generations.
